Jessar Industries Inc. is a family business founded in 1996.Through many years of experience in the import and distribution of household articles in the retail stores, Jessar refines its product ranges to specialize not only in household products but also in electrical products .

In just a few years, Jessar knew how to differentiate itself in its category of electrical products by creating its own Xtricity brand. In analyzing the needs of its clientele, Jessar mounted a comprehensive range of products for light bulbs, combining a superior quality as well as following the latest norms of governmental standards in order to be at the cutting edge of technology.

With its dedication to quality and customer service, Jessar distributes today its products across Canada in a variety of stores, including retail stores as well as the clients with national accounts.

Jessar hopes with the support of its loyal customers to continue being a leader in its field.

Les Industries Jessar Inc. est une entreprise familiale fondée en 1996. À travers plusieurs années d'expérience dans l'importation et la distribution d'articles domestiques dans les commerces de détail, Jessar épure ses gammes de produits pour se spécialiser dans les produits électriques et les produits pour la maison.

En quelques années seulement, Jessar su comment se démarquer dans sa catégorie de produits électriques de marque Xtricity. En analysant les besoins de sa clientèle, Jessar monte une gamme de produits complète pour les ampoules, combinant une qualité supérieure ainsi que le respect des plus récentes normes gouvernementales afin d'être à la fine pointe de la technologie.

Avec son dévouement pour la qualité et son service à la clientèle, Jessar distribue aujourd'hui ses produits à travers le Canada dans une variété de magasins, incluant les magasins à grandes surface et les clients de comptes nationaux.

Elle désire, avec l'appui de sa fidèle clientèle, continuer à être un leader dans son domaine.

Of all the colors contained inside the visible light spectrum, plants are most responsive to the energy contained inside red and blue wavelengths. Both types of energy play vital roles within plant photosynthesis processes where light energy is absorbed and converted into carbohydrate materials. These carbohydrate materials are then converted into food for the plant.

De toutes les couleurs contenues dans le spectre de lumière visibles, les plantes sont les plus sensibles à l'énergie contenue dans les longueurs d'onde rouges et bleues. Les deux types d'énergie jouent un rôle vital dans les processus de photosynthèse des plantes. Ces matières glucidiques sont ensuite transformées en nourriture pour la plante.
